# Sample Session Topics:

## **Finding Students' Happy Place: Optimal Placement in Read 180**

Through a combination of classroom scenarios and hands-on activities, you will have the opportunity to engage in the placement process yourself. By the end of the session, you will understand the placement assessment experience, how to find results on Ed, and how to use those results to accurately place students.

## **Foster Independent Reading with the Read 180 Bookshelf**

Witnessing a striving reader discover their own love for their "first" book is often stated as one of the favorite moments of Read 180 teachers. In this session, participants will learn about the Bookshelf and plan to implement tried and true procedures that transform the most reluctant reader into a reader excitedly managing a book stack.

## **Get the 411: Discover Key Reports**

Get the information you need about key reports in Read 180. We'll share what data informs instructional decisions and how to group and differentiate on Checkpoint days. You'll leave this session eager to dive into your students' data.

## **Prepare for Your First Three Weeks in Read 180**

Prepare for a successful start with Read 180. Receive guidance on setting up and managing your classroom, establishing clear procedures, and introducing instructional routines with the Getting Started Workshop.

## **Most Research Based Intervention: The Read 180 Experience**

See how Read 180's alignment to the 5 Pillars of Reading accelerates students to proficiency, whether they need support in foundational reading skills or in building knowledge, vocabulary, and comprehension. Read 180 also includes NWEA MAP Growth for automatic placement and progress monitoring, along with embedded supports for multilingual learners, including teacher-led curriculum for emerging English speakers.

## **Unlock the Power of Multilingualism: Making Connections Between Home Languages and English**

By understanding the similarities and differences between a student's first language and English, educators can tailor their instruction to meet each student's unique needs. Dive into English 3D's Contrastive Analysis chart and discover how to make meaningful connections between English and the top 11 languages spoken by multilingual learners in the United States.

## **Enhancing Academic Writing with Multilingual Learners**

Join us for an engaging session designed to empower educators in supporting multilingual learners with academic writing. This session will delve into best practices for sharing writing rubrics, ensuring students clearly understand expectations and criteria for success. Participants will also analyze a student writing model, gaining practical insights into effective feedback and instructional strategies.

## **The Real Deal of Planning for the Real Book Workshop Lessons**

Join us for a session focused on planning the Real Book lessons to effectively support the needs of each student in the class. This session will begin with navigating the flow of a workshop—reading comprehension, vocabulary, writing, and knowledge building. We will explore the must dos for each lesson and practice the seamless inclusion of instructional routines.

## **You Don't Have to Forget About Science and Social Studies to Improve Literacy Results Beneficial for all Leaders!**

Join this session to learn how Curriculum Director Andrea Burkiett approached planning for the implementation of Into Reading and ensured elementary students get time for two disciplines that directly impact developing knowledge.

## **Multilingual Learners Master How English Works: The English 3D Experience**

Learn more about English 3D's approach to accelerate English language proficiency for multilingual learners in grades K-12. The curriculum builds on existing linguistic skills, focuses on academic language, and supports the acquisition of English proficiency across reading, writing, speaking, and listening domains. English 3D provides engaging content, consistent instructional routines, and daily practice opportunities that help students acquire the language skills necessary for academic achievement.

## **Developing Reading Fluency with Primary Multilingual Learners Across the School Day (K-3)**

To meet the demands of reading curricula, multilingual learners rely on their teachers to serve as informed literacy coaches. In this practical workshop, the presenter introduces evidence-based instructional routines to promote reading fluency with challenge-level text through a teacher-led three-read protocol followed by accountable peer reading. The presenter models and reviews with video clips to clarify when to utilize specific routines throughout the school day, beyond text passages, including task directions, and complex word problems. Participants will receive resources for implementation.
